

*Judo – more
than sport!*

The 1st September 2010

Dear Mr. President,

The EJU President Mr. Sergey Soloveychik wishes to develop judo practice for all public. Judo is a global education method which contributes to educate children, to improve health, to have a better self-confidence. By this EJU Education program we wish to help club teachers to develop judo for all.

The judo development for all in Europe will pass through:

- Pedagogy adapted for each public;
- Sharing and exchange of experience between federations.

We invite you to mobilize the Education responsible of your countries to take part in the EJU Education Seminar taking place in Paris on the 16th-17th October 2010.

This seminar will gather all the Education responsible of the countries. It will be a good opportunity to present the EJU Education program, to share and exchange pedagogic experience between different countries. During this seminar we will define together the needs and the means to develop judo by EJU member federations.

We guarantee a good quality of pedagogical and technical intervention by the EJU experts in their field.

The success of this seminar will depend on the richness and diversity of participating countries.

We really count on your contribution to this seminar by sending a person representing the Education sector of your federation.

Sincerely yours,

Mr. Franco Capelletti

EJU Vice-President

Ms. Benedicte Rouby

EJU Education Director
