Safe Fall-Safe Schools JUDO UKEMI AT SCHOOL

EASTBOURNE, UK

SAFE FALL-SAFE SCHOOLS: research, training and transfer of the proactive and educational programme on protected and safe ways of falling in childhood based on judo. Analysis of its relationship with the prevention of injuries related to unintentional falls.

PARTNERS

STRUCTURE, MATERIAL

In order to respond to the training needs of the programme and to support the Institutions and teachers/researchers involved in the initiative, in a section of the JudoKs website, various contents and materials of the programme will be uploaded, which will be used to work on during the sessions, among others:

Specific exercises for assimilation and progressions of safe ways of falling, as well as a battery of games that provide kinaesthetic sensations related to balance, elements of perception and the transformation of patterns of response to falls.

- Theoretical and practical classroom sessions, both for University and Federative Trainers, as well as for university students, in order to facilitate and homogenise the contents taught. (In both cases the contents and exercises have been hyperlinked to video material of our own production, available online). Sportswear will be required for the practical sessions.
- Round tables to discuss the contents dealt with.
